

Windows Parental Controls

INSTALL • CONFIGURE • MANAGE

A step-by-step guide for parents, based on the SagiGuard product demonstration.

SagiGuard website — updated homepage shown in the demo

What you will learn

Download and install SagiGuard, register a parent account, manage schedules and blocking rules on the Windows desktop, and use the web portal to review activity and manage controls.

Website: www.sagitaourious.com | Edition: October 2026

01 Download SagiGuard

Start from the official Sagitaurious website.

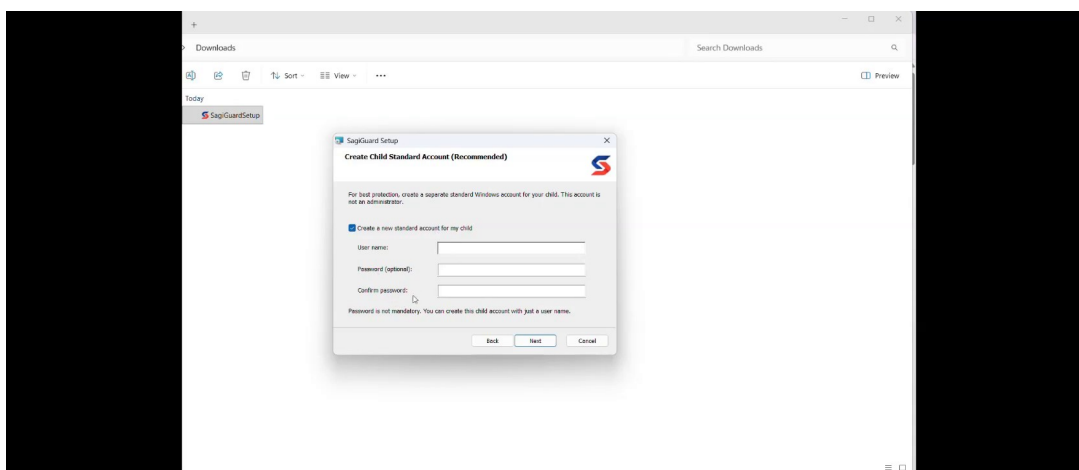

- Open a browser and visit www.sagitaourious.com.
- On the homepage, select Download SagiGuard to get the Windows installer.
- Open the downloaded setup program on the Windows PC you want to manage.

Home page and SagiGuard download entry point

02 Install on Windows

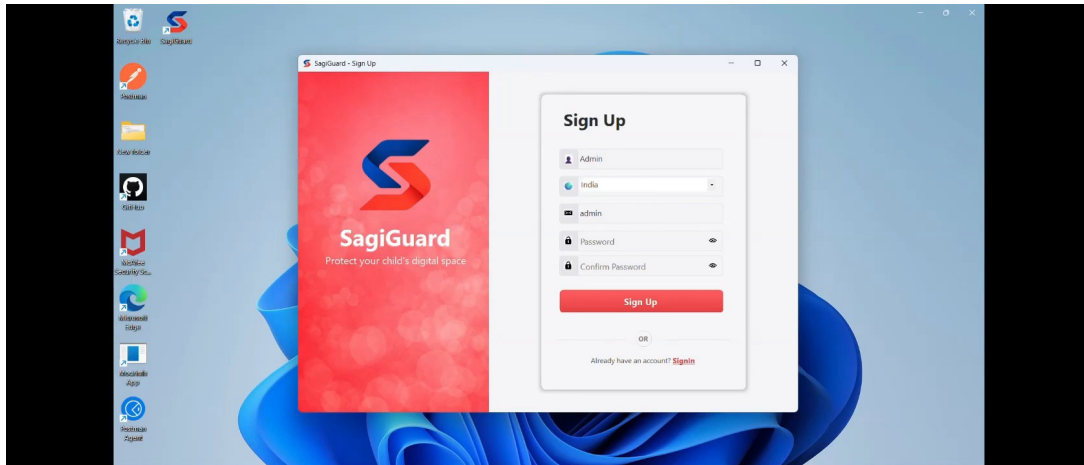

- Run the installer with administrator access.
- Review and accept the license agreement, then continue through the setup wizard.
- Review the installer options; where offered, you can create a separate standard (non-administrator) Windows account for your child.
- Select the final installation action and wait for setup to finish.

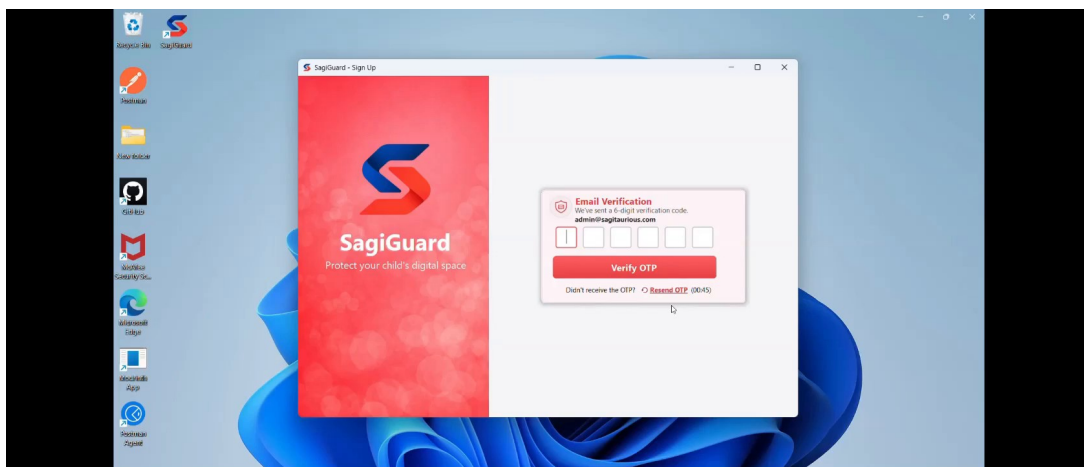

Windows setup wizard

03 Register your parent account

- Launch the SagiGuard desktop application and open Sign Up.
- Enter the information requested on screen and submit the registration.
- When the verification window appears, enter the one-time password (OTP) and confirm your account.

Parent registration on SagiGuard desktop

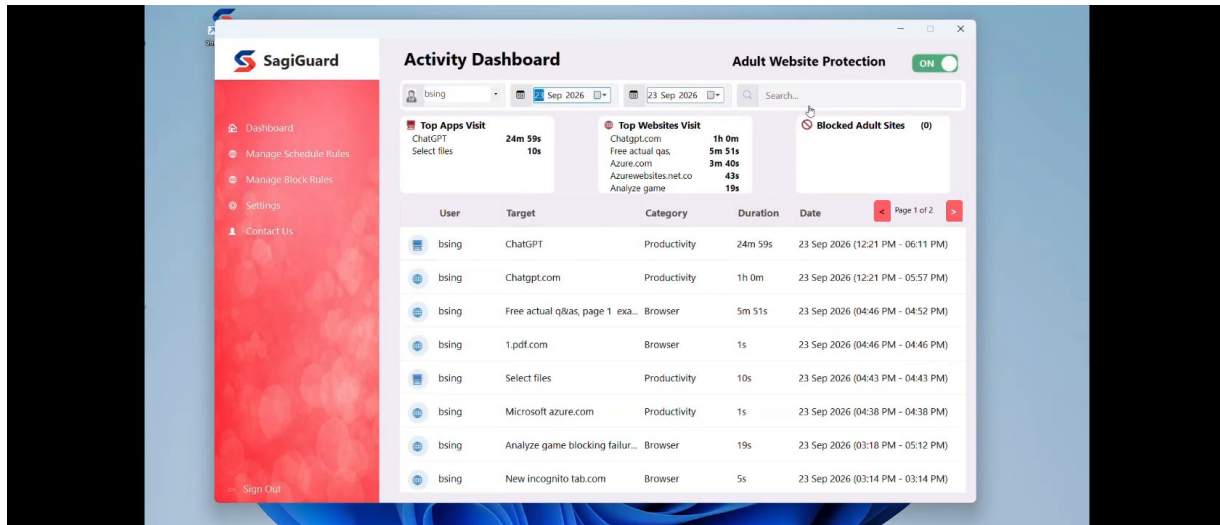

One-time password verification

04 Sign in to the desktop app

- Use the registered parent credentials to sign in.
- After sign-in, SagiGuard opens the Activity Dashboard, which gives you access to usage information and the navigation menu.

05 Understand the desktop dashboard

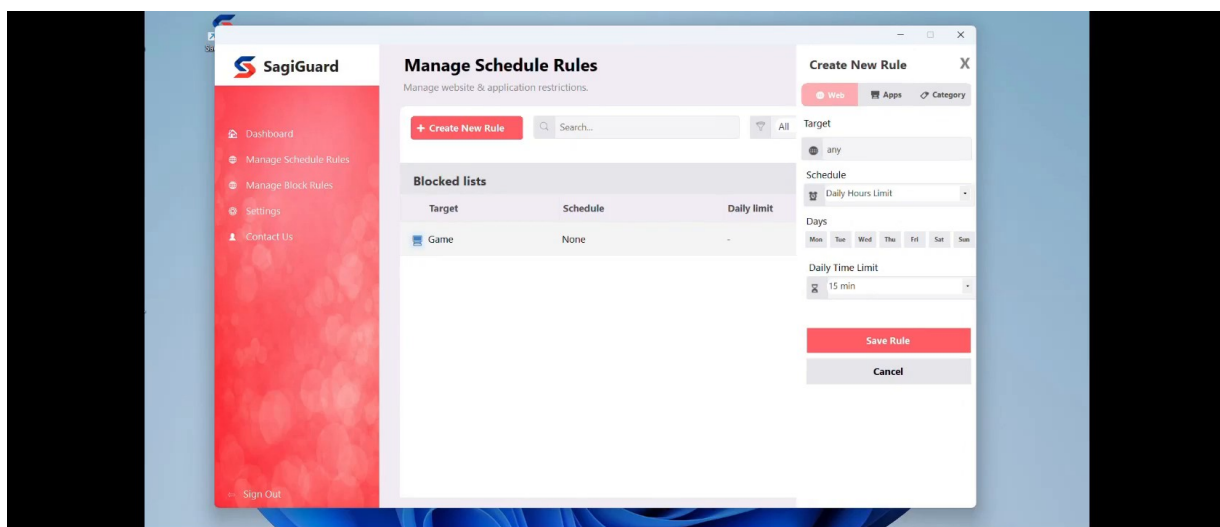

- Review the activity information displayed on the dashboard.
- Use the navigation menu to move to Manage Schedule Rules, Manage Block Rules, Settings, or Support.

SagiGuard desktop Activity Dashboard

06 Create and manage schedule rules

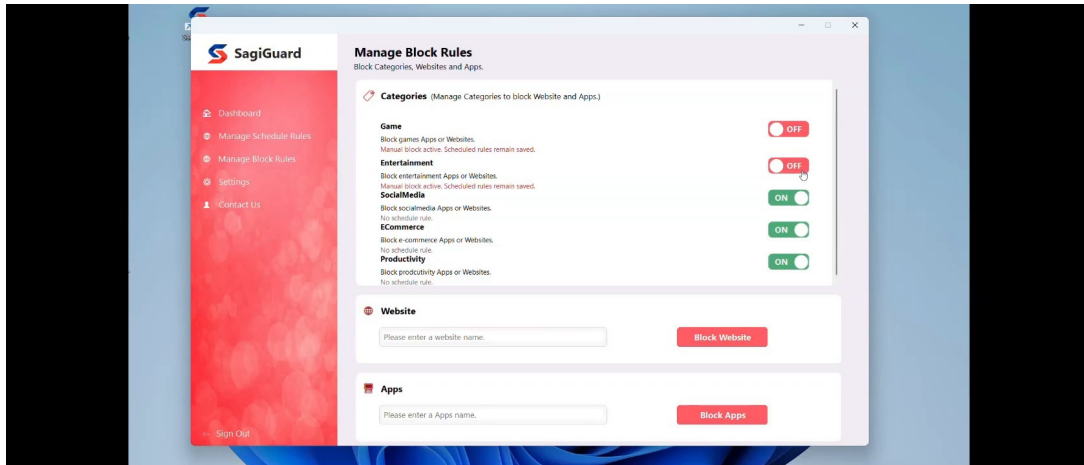

- Choose Manage Schedule Rules from the desktop menu.
- Select the app, game, or website to manage and choose the rule or schedule type presented.
- Specify the applicable days, time window, or daily usage allowance, as appropriate to the selected rule.
- Save the rule. Return to the rules list to review, edit, enable, or disable the configured rules.

Creating a schedule rule in the desktop application

07 Manage blocking rules

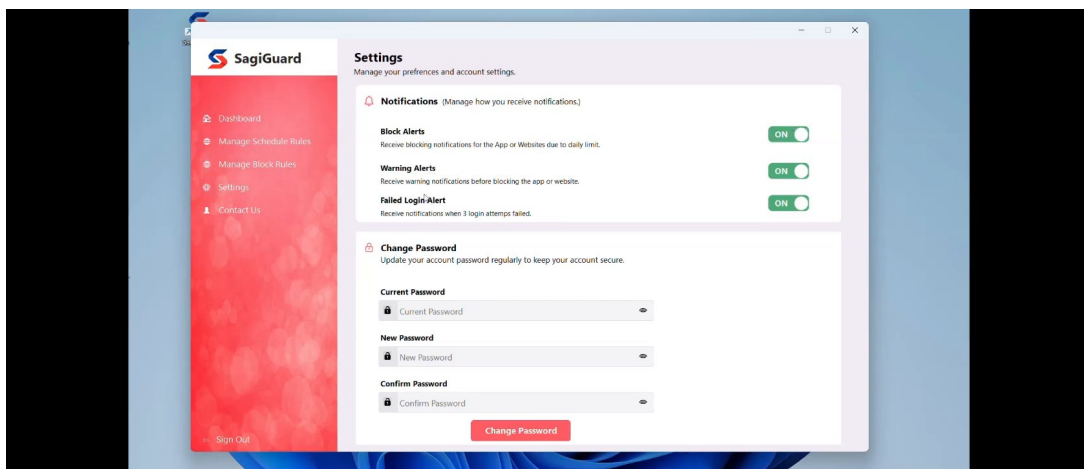

- From the desktop navigation menu, select Manage Block Rules.
- Review the available applications, websites, and content categories.
- Enable or disable blocking controls as shown for the items you want to manage.

Desktop Manage Block Rules

08 Settings and Support

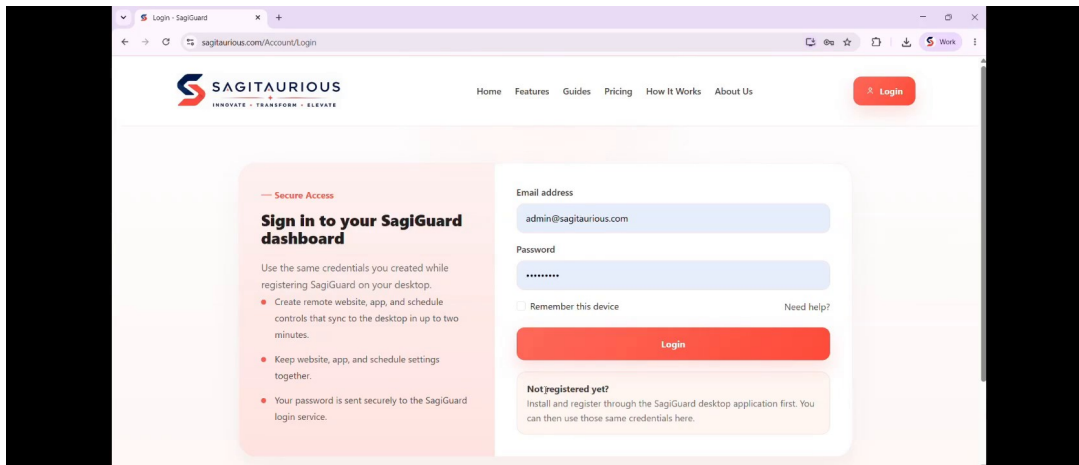

- Select Settings to review and adjust the preferences available in your installed version.
- Select Support to access the in-app contact or support options when you need assistance.

Desktop Settings screen

09 Sign in to the web portal

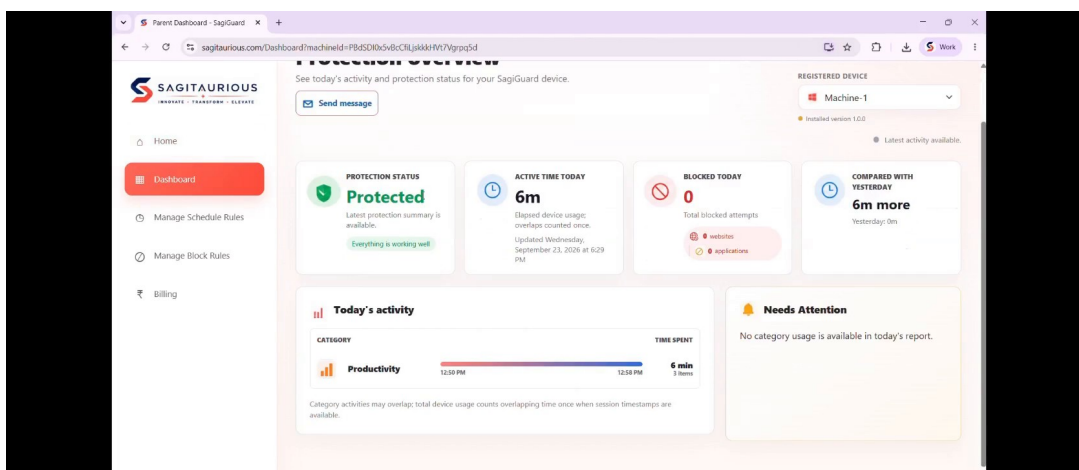

- Visit www.sagitaourious.com in a browser.
- Open the parent sign-in page and use the same registered account credentials.
- Once authenticated, open the web dashboard.

SagGuard web sign-in

10 Review activity and send parent messages

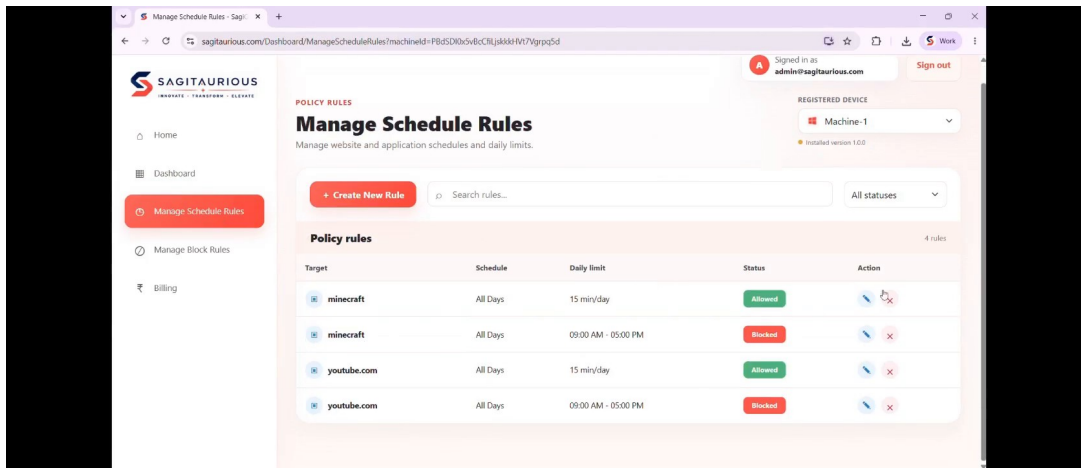

- Review the device overview and activity information shown on the web dashboard.
- Open an activity detail view to explore the available usage breakdown.
- To communicate with the managed computer, use the parent-message feature displayed in the dashboard, enter the message, and send it.

Web dashboard and activity overview

11 Manage schedules on the web

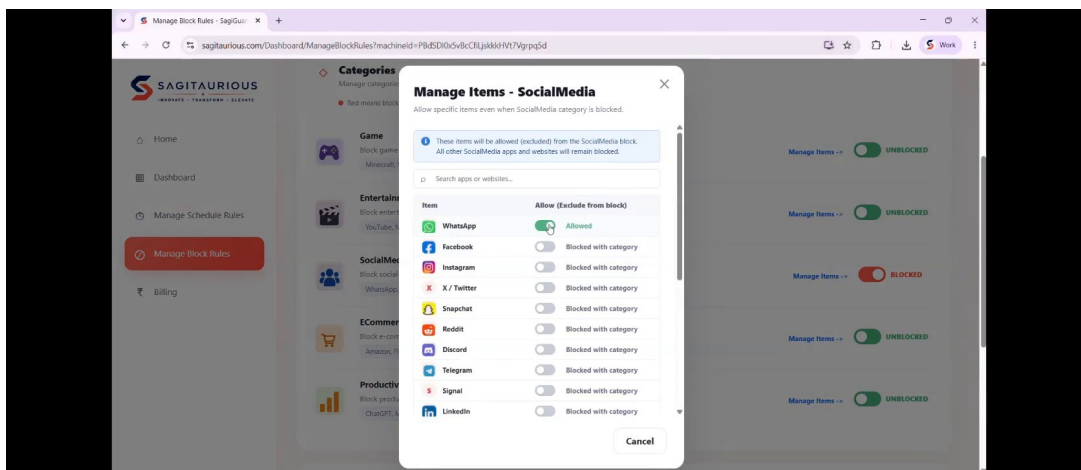

- Open Manage Schedule Rules in the web portal.
- Review existing rules or select the available action to add a rule.
- Configure its target and scheduling options, then save. Changes are synchronized with the desktop rules.

Web portal Manage Schedule Rules

12 Manage blocking and item exceptions

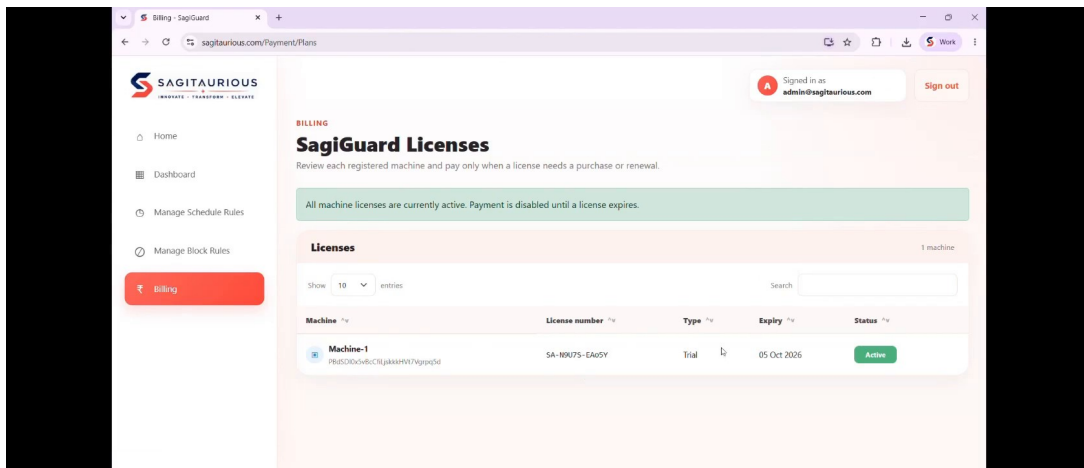

- Choose Manage Block Rules to review and adjust category-level restrictions.
- Use Manage Items to inspect individual websites or applications within a category.
- Adjust an item exception where appropriate, then save your change.

Manage Items — example of category items and exceptions

13 Review licenses

- Open Licenses from the web navigation.
- Review the license and subscription details shown for your account.

Web portal Licenses page

14 Everyday use — quick reference

Check usage — Open the desktop Activity Dashboard or the web dashboard.

Set a daily allowance — Use Manage Schedule Rules and configure a daily usage limit.

Restrict a category — Use Manage Block Rules on desktop or web.

Allow a specific item — Review the category in Manage Items and adjust an exception.

Contact the child's PC — Use the web dashboard parent-message option.

Get assistance — Open Support in the desktop application.

Notes

Screen labels and available controls may change with product updates. This guide documents the workflow shown in the October 2026 SagiGuard demonstration. Do not share account passwords or one-time verification codes.
